RESEARCH EXPERIENCE

Research Lab Principal Investigator & Coordinator July 2019 – present
Healthy Digital Habits Lab, Parkview Research Center

The Healthy Digital Habits Lab is a lab devoted to the studying and understanding the ways in which families and children use various technologies and the impact of this use. Every year, I manage and

mentor a team of 2 to 6 undergrad/grad-level research interns on study design, data collection, family observations, data management, analysis, research manuscript preparation, and more.

Research Lab Principal Investigator & Coordinator

May 2018 – June 2019

FamTEC²H Lab, Illinois State University

The FamTEC²H Lab (Families, Technology, Engagement, Couples & Children, and Happiness Lab) is a lab devoted to the studying and understanding the ways in which couples and families use various technologies and the impact of this use. Every semester (and summers as well) I manage and mentor a team of 5 to 10 undergraduate research assistants on study design, data collection, family observations, data management, analysis, research manuscript preparation, and more.

Principal Investigator & Project Coordinator

January 2017 – May 2018

Project INTERACT, Illinois State University

Project INTERACT (INternet, TEchnology, Romance, And Couple Time) is a longitudinal and daily diary study that seeks to understand how daily relationship interactions and quality are influenced by the presence of technology during couple time. As the Principal Investigator on this project, I conceptualized and designed this project. Along with my co-investigator, Michelle Drouin, and my research assistants, we recruited approx. 140 couples for this intensive longitudinal and daily diary study. I also managed data collection, data management/cleaning, analysis, and research manuscript preparation. Throughout the project, I also managed and mentored a team of undergraduate research assistants.

Principal Investigator & Project Coordinator

August, 2014 - July, 2016

Daily Family Life Project, Pennsylvania State University

The Daily Family Life Project was a longitudinal and daily diary study of family relationships that sought to understand the daily processes and variability in the coparenting quality of young children. As the Principal Investigator on this project, I conceptualized, designed, and recruited over 180 families for this intensive longitudinal and daily diary study. I also managed data collection, data management/cleaning, analysis, and research manuscript preparation. Throughout the project, I managed and mentored a team of undergraduate research assistants.

Graduate Research Assistant

August, 2010 - December, 2015

Project SIESTA, Pennsylvania State University

Advisor: Doug Teti, Ph.D.

Observational coding of parenting practices and behaviors as well as infant state and behaviors at bedtime, contributed to creation and revisions of coding schemes, developed observational coparenting scales at bedtime, created coding templates, authored and revised manuscripts and posters for presentation and publication, trained and managed other observational coders, assisted lab members with data analysis.

Graduate Research Fellow

August, 2013 - August, 2015

Family Foundations, Pennsylvania State University

Advisor: Mark Feinberg, Ph.D.

Funding: Prevention and Methodology Training (PAMT) Fellowship
